Bitcoin on Base (BTCB) was launched in May of 2024 with a mission to serve as a blue chip asset at the center of the Base ecosystem. Offering a unique store of value with absolute digital scarcity, while leveraging the scalability of Ethereum, BTCB seeks to offer a second chance at Bitcoin.

Bitcoin on Base was designed to have a maximum supply of 21 million tokens, matching the maximum supply of Bitcoin. It is estimated that over 5 million Bitcoin, or 24% of the supply, have been irretrievably lost, meaning that the owners can no longer access their coins. Looking to replicate this additional layer of scarcity, the Bitcoin on Base deployer directed 5.16 million tokens to a burn wallet, permanently removing them from the supply. Thirty days after launch, an anonymous community member sent an additional 210,000 tokens to the burn wallet in furtherance of this initiative. This reduced the circulating supply to just 15.63 million tokens, making it one of the scarcest crypto assets in existence today. The BTCB contract is renounced, and Liquidity Pool (LP) is burned, meaning a person cannot pull liquidity they do not own.

One of the most compelling aspects of Bitcoin on Base is its strong community-driven approach. The community controls every aspect of the BTCB movement, ensuring that it remains true to its principles of decentralization. This collective governance model fosters a sense of ownership and participation, encouraging everyone to contribute to the project's success. Bitcoin on Base is a movement of the people, by the people, for the people.

## ABOUT BASE

Base is an an Ethereum Layer 2 (L2) chain incubated within Coinbase. Base is built to be the onchain home for Coinbase products, as well as an open ecosystem where anyone can build. Powered by Optimism's OP Stack, Base is one of the most secure and scalable L2s in existence today. Base is a safe, low-cost, builder-friendly platform built to bring the next billion users onchain.

## LOGO & LICENSING

The Bitcoin on Base logo pays homage to Bitcoin, the first decentralized cryptocurrency. Our logo is issued under Creative Commons Zero (CC0). CC0 is a license that allows creators to give up their copyright and related rights to their work, making it part of the public domain. This means that anyone can use the Bitcoin on Base logo without restriction. Our official color palette is shown below.
